

PRODUCT DESCRIPTION

Intu blinds, available as 15mm and 25mm Venetian Blinds or Pleated Blinds, are ideal for conservatories, glazed doors and tilt and turn windows. The slim profile fascia fits neatly into the window and door frames so the blind sits inside the bead, allowing easy operation of window or door handles. Light gaps are minimised, giving exceptional control of solar heat and light. Intu integrates perfectly with windows and glazed doors to give exceptional control of light and a sleek simple finish through venetian and pleated blinds.

INTU SCREWFIT

An intelligent tension system holds the blind in place, allowing the blind to be raised or lowered to any position, also preventing it from rattling against the glass when opening and closing the window or door allowing up to 15° of tilt. The unique design offers superior venetian slat closure with side or top control options to tilt the intu blinds, giving excellent shading.

INTU BEADFIT

Intu Beadfit is the latest innovation in the Intu range that gives you superior control of light and heat in your room, in a sleek and modern blind. Designed to fully integrate with all modern windows including tilt and turn and half glazed doors, this unique design fits neatly into the frame of your windows and doors. The patented no-drill bracket system means that blinds can be clipped in place in a couple of minutes.

MULTIZONE

Multizone is a new feature for Intu Pleated or Cellular blinds, allowing limitless options for height control and privacy. The innovative use of two adjustable rails allows the blind to be moved from the top down as well as from the bottom upwards. The blind can be set at the exact position you require, to provide the shade that you want whilst still allowing light into the room. Especially suitable for providing privacy in ground floor and basement flats, and shade for computer screens.

CELLULAR

Intu Cellular is a unique fabric that gives you superior insulation with a modern sleek look. Creates a beautifully soft diffused light in the room. Unique construction means that there are no visible holes in the fabric giving a smooth modern look. Each “honeycomb cell” in the fabric traps air, keeping your room cooler in summer and warmer in winter. Light but extremely strong structure that holds its shape and always looks great.

CONTROLS

Easy to operate, simply raise and lower the blind by hand. Neat and simple control options eliminate the need for free-hanging cord loops, making it one of the safest blinds available. Choose from Venetian slat, Pleated and the new Cellular fabric, in an extensive range of colours and finishes. Intu provides a range of installation options to fit most sizes of modern windows including larger windows and longer drops.
